Installation

No
Corrosion

Long
Service Life

Light
Weight

An ISO 9001:2000 Certified Co.

ATUL HDPE Pipes

are manufactured under strict quality control systems. The pipes are produced with high quality virgin material to last longer working life under all climatic conditions, strictly as per IS : 4984 Standards.

A Thorough and Stringent testing of ATUL HDPE PIPES is done in ULTRA MODERN IN HOUSE TESTING LABORATORY. Complete Quality Control and check right from stage of Raw Material until packaging and despatch is managed by Highly qualified and experienced personnel.

Salient Features

- Smooth Internal Surface.
- Tough and Strong.
- Flexibility.
- Light weight (upto 4-6 times lighter than G.I. Pipes)
- Quick and Easy jointing.
- Wear and Abrasion Resistance.
- No special maintenance required.
- No effects of Ultra Violet Rays.
- Inert to most chemicals.

Applications

- Delivery lines for submersible pumps
- Water supply lines
- Chemical & edible transportation
- Effluents & waste water disposal
- Domestic gas distribution
- Submersible pump & underwater pipe lines
- Sprinklers and drip irrigation

Range

Size (OD) - 16 mm to 140 mm
 Standard length (Coil) - 50 mtrs, 100 mtrs,
 200 mtrs & 300 mtrs. (depends on the size)
 (Cut Length) - 6 meters

ATUL EASYFLOW HDPE PIPES

Length	Being flexible can be coiled. Coil lengths available in 50,100,200 & 300 mtrs
Corrosion	Excellent corrosion resistance to water, acids & alkalies
Inner surface	Smooth inner surface offers very low frictional resistance.
Weight	Nearly 4 to 6 times lighter than GI pipes.
Jointing	No/less joints due to coil.
Maintenance	Virtually maintenance free. The joints are 100% leakproof.
Installation	Easy - No special equipments are required.
Running cost	Submarine pump can be installed in 1 hour time for depth more than 80 mtrs. Unit cost of delivered water is approx. 15 to 20% lower than GI pipes.
