ATUL WATER STORAGE TANKS (AWST)

Pioneers in storage tanks have proven to be superior substitute to conventional RCC & M.S. Tanks by virtue of their un-matched properties & unbeatable performance. Atul Tanks are manufactured from approved grades of polyethylene, i.e., LLDPE by sophisticated roto-moulding machines with latest technology, utilities for both domestic and industrial purposes. Atul Tanks is on the march to excellence and now emerging up high in the market scene.

Serving our best to the world

Cylindrical Vertical Tanks (CVT)

S.No.	Capacity Litres	Dimensions (mm)		
		Dia.	Height	Manhole size
1.	200	725	585	280
2.	300	730	875	280
3.	500	895	950	400
4.	750	985	1085	400
5.	1000	1090	1200	400
6.	1500	1325	1275	400
7.	2000	1375	1675	450
8.	3000	1450	2050	450
9.	5000	1950	1925	450

Loft Tanks

S.No.	Capacity Litres	Dimensions (mm)		
		L	W	H
1.	100	587	587	375
2.	200	1040	700	280
3.	300	1050	850	300
4.	500	1400	910	490

Advantages :

- Light Weight** : Hence easy to transport and reduce dead load on structure.
- Low Cost and Durable** : Economical as compared with RCC & M.S. Tanks and lasts for years and years.
- Hygienic** : Suitable for potable water & does not impart any taste or odour.
- Easy to Clean** : Hence does not promote growth of bacteria & insects.
- Maintenance Free** : Requires no painting, no water proofing or anti-corrosive treatment.
- High Impact Strength** : Because moulded in single piece without any seams, joints or welds.
- Versatile** : Can be used for underground, overhead, indoor storage & transportation.
- Easy to Install** : All Atul Tanks can be proved with Giftings in sizes 1/2", 3/4", 1", 1 1/2", 2" for outlet-inlet, overflow and scour connection and foot valve. The tanks can be provided with PVC & Brass fittings optional.
- Available** in different colours.

Note : The information given herein are in good faith but does not carry any warranty. Specifications may change from time to time.
